ONE REASON FOR CURTAILMENT

Prediction of Salt Laker of Several Weeks Ago Seems Bearing Fruit.

NEED OF CAPITAL BY NEW COMPANIES

Public Confidence Is Essential to Public Contributions of Money.

Two months ago it was not an easy thing to realize that there would be a general curtailment of copper production, yet one Salt Laker urged upon The Tribune that such a programme would be adopted, and that the big porphyry copper interests would favor such action, doing everything possible to bring

tion, doing everything possible to bring it about.

The theory of this prophet was that the demoralization occasioned by the maximum output plan was spreading so thoroughly into the public mind that everyone was becoming doubtful of copper stocks, and would become more doubtful as conditions grew worse. It was pointed out that there may be some of the new copper propositions, now being made ready for production throughout the west, not completely financed, and it would not be an easy matter to place new stocks or bonds with the copper situation so badly demoralized. Hence, some action along the lines of curtailment was imperative.

Now comes the Miami Copper company with an increase of something like 70,000 shares of stock, which they ask stockholders to take over at 18 in proportion to their present stock holdings. One official of the company in the east stated yesterday that this increase was not for the purpose of taking over the Keystone company as reported, but to acquire some new land and to increase the capacity of the mill.

Time only will demonstrate how many more of the newer companies will be compelled to draw on stockholders for additional money to round out projects now in process of completion, but the situation has very much the appearance of checking up The Tribune's informant of several weeks ago. There are ways of choking a cat to death without wasting soft butter.

BETTER LEAD PRICES ARE CONSIDERED CERTAIN

A canvass among the mining and smelting circles of the city in search of opinions regarding the lead situation discloses a practically unanimous belief that lead prices are due to rise, but there is nothing now in the situation of a sufficient tangible form to permit any definite idea as to when the upward movement would begin. One smelting engineer said to The Tribune yesterday:

"There is a scarcity of lead ores, and there are no new lead camps being opened up. The production is very unsatisfactory, yet at the same time there is such a reduced consumption that prices for the metal do not have a chance to harden. In explaining the unsatisfactory conditions now existing with the National Lead company. President L. A. Cole laid special emphasis on the diminished trade and the increased price of linseed oil, and this company, which stands to the lead smelters as the smelters stand to the lead mine owners, has had to reduce its dividends.

"Hard times atrikes right and left, without regard to feelings. During the present slowing-up period the property owner is not painting his house as a rule, no matter how hadly it needs it. Money is tight, so the homes must go without a fresh coat of paint until next year. Reduced building operations mean a reduced demand for plumbing supplies, of winfow thich lead, provides the important item. These are only two points in a situation of unfavorable import. The only

uation which is interwound with condi-tions of unfavorable import. The only tions of unfavorable import. The only question is not will prices improve: it would be ridiculous to doubt this; but when will they improve?"

NEVADA CONSOLIDATED TO CONTINUE ITS DIVIDENDS

Over the Pollock wires yesterday from New York came the assurances from a director of the Nevada Consolidated company that this organization would continue to make and distribute its usual dividends. \$1.50 per share per annum, although the production will be cut to about 5,000,000 pounds of copper permonth. This is a reduction of about 1,000,000 pounds monthly. The increase in the price of copper since the campaign of curtailment was determined on will just about even up with the Nevada Consolidated for this reduction in output. If, for instance, the company can make copper month on a 12-cent copper market; it can earn \$250,000 per month on a 13-cent copper market with a 5,000,000-pound production.

Ore Shipments.

The Utah Ore Sampling company on Friday released 8 cars of ore from Utah and 1 from California camps.

SHOSHONE IS NOT GETTING RESULTS

Stockholders Believe That They Are Entitled to Report on Conditions.

Stockholders of the Montgomery-Shoshone Consolidated company of the Bull-frog. Nev., district are in receipt of the statement of the operations during last May, the report being dated July 1, and signed by the treasurer of the organization. The receipts during May amounted to \$22,245.09; disbursements, \$22,938.49, leaving a loss for the month of \$693.40. The company has bills payable, with accrued interest, to the amount of \$219,-584.16.

S84.15.

The Montgomery-Shoshone has been a great disappointment to its stockholders, the amount of tonnege claimed in the first place being so far out of proportion to the facts that the world almost gasped at the time of the revelation. This is the second or third time this year that the operations have shown a deficit, and many believe that they should be given some authoritative information to explain the present unsatisfactory results.

MARKET IMPROVEMENT IS HOLDING WELL ON 'CHANGE

The upward tendency of mining stocks on the local exchange was well maintained Friday, and the several specialties enjoying unusual demand go to prove what might be the case should conditions justify a wider participation in the market on the part of the public. The business transacted totaled 44.805 shares sold, the market value of which was \$19.736. The following were the closing unlisted and listed stock transactions:

Common Stock of American Company Suffers From Excessive Selling.

COMING ANNUAL MAY DISCLOSE REASONS

Financial Condition of the Company in Past Years Is Given.

There may be some disclosures at o incident to the coming annual stockholders' meeting of the American Smelt-Refining company, which is scheduled for September 7, in the east, which will explain the weakness of the ommon stock in the eastern markets This common stock sold for 64% low Fri-

This common stock sold for 64% low Friday in New York, the record low of 1909 being 77% and high 105%.

The wires from the east have intimated recently and persistently that a reduction might be expected in the next dividend on the common stock. The common stock, these hard times, has the small end of the horn dividend-wise, for profits must first be paid on the preferred stock of the company, and the company, in addition, has guaranteed 5 per cent dividends on the \$2,500,000 series B stock of the American Smelters Securities company, before there is dividend money available for the common stock.

stock.

The American Smelting and Refining company is capitalized for \$100,000,000.
\$50,000,000 of which is 7 per cent preferred stock, and \$50,000,000 common. The series B stock holdings in the Smelters Securities company gives the American company control of that organization. The American company, among other assets, owns and operates some twenty different copper and lead smelters and refineries, the plants being located in Utah, Colorado, New Jersey, Illinois, Texas, Nevada, California, Washington, Montana and in Mexico, being the largest concern of its kind in the world. The last financial statement of the company

ALLIS-CHALMERS WILL MANUFACTURE VANNERS

The Chicago plant of the Allis-Chalm ers company will have the task of manu-facturing the Isbell vanners, just pur-chased by the Ray Consolidated and chased by the kay Consolidated and Chino Copper companies, of which there are over 1500 to be made. The contract for the work has been let to this firm by the Galigher Machinery company, which was the successful seller to these new Arlzona red metal companies.

COPPER EXPORTS ARE GROWING RIGHT ALONG

Over the Pollock wires Friday came the information that for the week ending August 11 the copper exports were 6233 tons, an increase of 4092 tons over the same period of last year. The copper exports for the month to date were 11.685 tons, a decrease of 868 tons, and from January 1, 162,278 tons, a decrease of 207,715 tons. A large producer of copper in the Lake Superior section is reported to have sold its metal up to the middle of September at 122 cents.

Nevadas in San Francisco. James A. Pollock & Co., bankers and brokers, furnish the following, received over their private wire yesterday after-

AMERICAN FORK IS SCENE OF RESULTS

Several New Properties Are Showing Ore in Shipping Quantities.

Special to The Tribune. AMERICAN FORK, Aug. 12.-The tockholders of the Comstock mine in American Fork canyon are feeling very much encouraged with the showing the miners have at the present time

much encouraged with the showing the miners have at the present time. They started a new tunnel on their workings this spring and are only in about fifty feet, and have encountered small leads of carbonate ore carrying good values in lead and stiver. This property is right in the bottom of the canyon, near the road, and should ore in sufficient quantities be encountered, it would be immediately on a paying basis. The location and the showing this company has at present makes the property one of the most promising in the district. William Greenwood has charge of the work.

At the Pacific, Harry Kruse, who recently took the management of this property, is meeting with good success. He is taking out a number of sacks of good lead and zinc shipping ore each shift and probably fifty tons of second-class also. The company is negotiating with the smelter people for a contract whereby they can sell this ore without separating the lead from the zinc. If this can be accomplished, the company will install ligs and crusher, and when these firrangements are consummated it is thought that the mine will be worked at a good profit. The first-class ore that they are sacking now will almost pay the expenses of the mine, and the prospects for the success of this property look better today than ever.

The leasers of the Yankee, in the American Fork canyon, are making good money on the ore they are shipping. The third car is being loaded here now. Returns from the ones shipped gave them between \$1400 and \$1500 per car. The ore is in large boulders, some of which weigh from five to ten tons each.

The boys working at the Bay State are feeling very much encouraged at the way the property is onening up. The streak of lead-silver ore that they encountered is opening up better with every foot of distance galned. The vein at present is about fourteen laches wide, and runs from the top to the bottom of the tunnel. This vein carries splendid values in lead and silver.

RATHER BULLISH IN THE EASTERN CENTERS

James A. Pollock & Co., bankers and rokers, furnish the following, received ver their private wire yesterday after-on:

James A. Pollock & Co., bankers and brokers, furnish the following, received over their private wire yesterday afternoon:

Paine, Webber & Co. Letter, Boston.—Every day there are more evidences of the beginning of a buil market in coppers. The volume of buying is larger and the amount of stocks for sale is small. Copper Range advanced two points on the purchase of 200 shares. North Butte railied two points further and closed at the top. Local traders are taking all the Hancock they can find. Buy coppers and buy them now for a good advance.

Logan & Eryan Stock Letter, New York.—Aside from the pressure of Smeltors, the general list displayed considerable strength throughout today's session. Trading was mostly of a professional character and that element was inclined to be rather pessimistic, but in the absence of heavy selling reversed their position and caused a higher range of prices to prevail. Specially movements were more prominent than heretofore and were conducted without meeting much reelstance on the advances. The fact that the list is responding easily to the moderate professional demand without a large outside following has served the purpose of committing a great many to the long side, but the action of the list under realizing sales still remains to be seen. As expressed recently we don't feel especially pessimistic with regard to quoted security values, but at the same time fall to see the wisdom of taking hold of the long side aggressively under prevailing conditions. The market seems more than likely to fluctuate within a limited area pending something of character, which may stimulate activity in either direction, and meanwhile it would seem to be polley to continue to lighten accounts on the long side. Hornblower Letter, Boston.—Copper shares were strong and in good demand during the greater part of today's session and advances were general throughout the list. Gains ranged from a fraction to two points. The buying wasmuch better than for some time past. Good judges are still builish for the lo

very bare of stocks. Ohlo Copper sold up to 2, and the entire market, in my opin ion, is a purchase.

New York Sun—Speculative operations for the advance were resumed today in the stock market with some vigor. They began in London, where an all aroung gain of a half point or more in the international list was reported before the opening here, and London followed the upward movement later by buying about 15,000 shares of stocks on balance in evidence of its acceptance of the theory that manipulation for rise is unmistakably under way. Wall street trading publicalso took large part in trading, being by now fairly well persuaded of the enlistment of strong interests in favor of the rallying movement. The speculative community is not at all disposed to be too skeptical of the upturn, for it has it mind the fact that just as speculator keen feeling for the bottom of a decline in the market so the market itself grope for the end of a period of adverse fundamental conditions and endeavors to discount a change for the better in them If the stock market is mistaken, relapse of course follows. If it proves to bright, there is so much profit in the discounting process as to make the price templing.
